**Subject:** Petroglyph Operating Mechanical Integrity Extension

Mr. Breffle,

As per our earlier conversation, Petroglyph Operating is requesting an extension of the 90 day deadline for restoring mechanical integrity on our Ute Tribal 05-08 Injector, EPA Permit # UT2736-04324. The well originally lost mechanical integrity on October 19, 2014 and the deadline for repairing the well is January 19, 2015. This well has suffered from low injection volumes for some time and Petroglyph's Engineers are in the process of planning workover operations for this well and other wells with similar problems. An extension of 120 Days will be very advantageous for Petroglyph Operating and will allow our staff to combine the workover operations and the restoration of mechanical integrity into one job. The extension will also allow us to postpone the work to a more seasonally advantageous time.

Please let me know if you need any more information, your consideration is greatly appreciated.

Regards,

Rodrigo Jurado
